How many lambs can you afford to lose?

Without warning, enzootic abortion and toxoplasmosis can take significant numbers of lambs, increasing your workload and stress at lambing whilst reducing profit. Nearly 3 out of 4 flocks tested harboured either enzootic abortion or toxoplasmosis. 43% have both¹.

Vaccinate with **Enzovax**[®] and **Toxovax**[®] to help protect your flock and realise your scanning and lambing potential.

enzovax[®]
toxovax[®]

Together raising healthy lambs
